LYON, France, May 11, 2021 -- EDAP TMS SA (Nasdaq: EDAP) (the "Company"), a global leader in robotic energy-based therapies, announced today unaudited financial results for the first quarter of 2021 and provided an update on strategic and operational developments.

Marc Oczachowski, EDAP's Chairman and Chief Executive Officer, said: "We are thrilled to have completed a successful offering in April which, added to our existing strong cash position, provides funding to achieve potentially value-creating milestones across all aspects of our business. We are acutely focused on driving accelerating growth in the US by building market access and coverage now that our Category 1 CPT code is in place. We also continue to advance our Phase 2 endometriosis program and have now opened a second trial site in France where we commenced patient treatments last week.

"While we continue to experience some effect of COVID-19 on our operations, we are pleased with the global performance of our business as compared to the first quarter of last year. We grew revenue by 35.4%, expanded our gross margin to 42.4%, and generated a profitable quarter for the company. We also saw continued growth in our Focal One and HIFU treatments in the US, reflecting increasing awareness and adoption of our next generation HIFU technology."

"In summary, with our strong balance sheet and US growth initiatives continuing to gain traction, I believe we are well positioned to drive growing adoption of HIFU for the management of prostate cancer in 2021," Mr. Oczachowski concluded.
