

## **EDAP's Ablatherm-HIFU Featured on WABC-TV in San Francisco, CA**

December 21, 2009

As we continue to actively enroll patients in the HIFU arm of our ENLIGHT clinical trial, we are pleased to announce that WABC-TV in San Francisco, CA recently aired a piece on High-Intensity Focused Ultrasound (HIFU) and the benefits of EDAP's Ablatherm-HIFU as a robotized, non-invasive treatment in patients with localized prostate cancer. Dr. Cary Robertson, Primary Investigator of the ENLIGHT trial at Duke University Medical Center; and Frank Roundtree, a recent HIFU treatment recipient, discuss the potential of Ablatherm to provide greater efficacy, fewer side effects, and better quality of life for patients and their families.
